OTHER IMPORTANT INFORMATION

Content Justification

One of the career opportunities for the graduates of this Master is the field of health professionals connected to the design of English courses for specific purposes of medicine and nursing, reviews and translations on health issues and even work as translators in health institutions. There is also a wide territory for research on health issues related to physiotherapy, medicine and nursing degrees.

Courses Related in Study Plan

This course relates to other subjects in the Professional Applications Module, and also to the Research Module.

Required Knowledge to Address the Course

The Master courses are taught in English. Students must reach at least B1 level in the European Common Frame for Languages, which allows the comprehension of texts used in their academic training. Students must know how to express themselves adequately, both orally and in writing, in order to be able to progress satisfactorily in his studies.

Pre-Required Knowledge

The Master courses are taught in English. Students must reach at least B1 level in the European Common Frame for Languages, which allows the comprehension of texts used in their academic

training. Students must know how to express themselves adequately, both orally and in writing, in order to be able to progress satisfactorily in his studies.

COMPETENCES

OBJECTIVES/LEARNING OUTCOMES

Provide our students with a new 'registry' that facilitates their access to the field of science and technology in English. 1. English for members of one of the following disciplines of knowledge:

psychology, medicine, chemistry, microbiology or natural sciences. 2. Writing principles:

Orthotypography, nomenclature, terminology, units, abbreviations, acronyms, etc., and linguistic uses of the discipline in question. 3. Use of written language to communicate with clarity and precision (Set of descriptions of the specific grammatical features of scientific English, and how and when to use them) 4.

The style of scientific writing 5. Make writing legible 6. Improve science and technology vocabulary

PLANNING

Contents

1. Needs analysis

2. Online course

3. Specific glossary

4. Localization and design of new teaching materials in the field of English for Health Professionals

Learning System and Methodology / Contingency Plan

50% FACE-TO-FACE CLASSES (PARTICIATORY MASTER CLASS, SUPERVISION OF THE DEVELOPMENT OF THE COURSE FOR HEALTH PROFESSIONALS, PREPARATION OF THE GLOSSARY).

50 % ONLINE (AUTONOMOUS STUDENT WORK, HANDING IN DEVELOPMENTS IN THE PREPARATION OF THE GLOSSARY AND ONLINE COURSES THROUGH AULA VIRTUAL).

Alternative plan: Faced with high levels of health alert, face-to-face activities will be taught online (via

videoconference).

Teaching Innovation Activities

Functional Diversity / Functional Disability

Those students with special disabilities or educational needs may contact the Delegation of the Rector for Functional Diversity (<http://www.ual.es/discapacidad>) to receive appropriate guidance or advice and facilitate better use of their training process. In the same way, they may request the implementation of the necessary adaptations of content, methodology and evaluation that guarantee equal opportunities in their academic development. The treatment of information about these students, in compliance with the LOPD, is strictly confidential. The teachers responsible for this guide will apply the adaptations approved by the Delegation, after notifying the Center and the course coordinator.

COMPETENCY ASSESSMENT

Criteria and Assessment Tools / Contingency Plan

ORDINARY AND EXTRAORDINARY CALLS

ORAL PRESENTATION OF STUDENT'S COURSES FOR HEALTH PROFESSIONALS (60%).

ONLINE COURSES (20%). GLOSSARY (20%).

ALTERNATIVE FINAL SINGLE EVALUATION: 100% PRESENTATION OF STUDENT'S COURSES.

"Alternative Plan: The information indicated in the assessment section will be maintained. In cases where the health authorities advise and / or agree not to attend the assessment tests in the ordinary and / or extraordinary calls, the tests indicated will be done through the virtual platform "

In accordance with the provisions of Ch. 1.4.4 of the "Regulations for the Assessment of Student Learning at the University of Almería", the practice of plagiarism will be penalized both in the work done by other students and in bibliography and web pages.

Follow-Up Mechanisms

- Office hours
- Attendance and participation in seminars
- Registration and access to Aula Virtual
- Participation in communication tools (discussion forums, emails)
- Delivery of class activities in class
- Delivery of activities in Aula Virtual
